Reframing Genocide across Species Lines: Learning from Intersectional Approaches in Animal Studies

Financial support for this session is provided by the Federation for the Humanities and Social Sciences

Susan McHugh (University of New England in Maine)

Chair: Belinda Kleinhans (Texas Tech University)

Provocative titles like Marjorie Spiegel's *The Dreaded Comparison: Human and Animal Slavery* (1988) and Charles Patterson's *Eternal Treblinka: Our Treatment of Animals and the Holocaust* (2002) indicate how analogical reasoning has long set advocates of human and animal rights at loggerheads, but not inevitably so. By refusing to reduce the experiences of the humans to a representation of animal life (or vice versa), new scholarship at the crossroads of animal studies and perpetrator studies provides more nuanced accounts, for instance, of the weaponizing of dogs in the Holocaust. More explicitly intersectional approaches complicate the situation further by accounting for BIPOC experiences of genocide, nowhere more clearly than in the stories of nomadic tribal peoples whose traditional human-animal relationships, so often sources of cultural strength, became points of weakness through settler colonialism. This talk illustrates what can be learned from narrating genocide across species lines through the Qikiqtani Truth Commission, the Indigenous-initiated and –administrated model for the Truth and Reconciliation Commission of Canada, through which the question of why Inuit sled dogs disappeared in the mid-twentieth century led to the documentation of and eventual reckoning with cultural genocides.

Susan McHugh is a Professor of English and an internationally renowned expert in literary theory, animal studies, and plant studies. She has published three authored monographs *Human-animal Stories Against Extinction and Genocide* (Penn State UP 2019), *Animal Stories: Narrating across Species Lines* (Minnesota UP 2011), recipient of the Michelle Kendrick Memorial Book Prize; and *Dog* (Reaktion Books 2004), which has been translated into six other languages. She is Series Co-editor of Palgrave Studies in Animals and Literature, Humanities Managing Editor for *Society and Animals*, and as Editorial Board Member to five other scholarly journals.

There are diverse ceremonies for specific intentions and requests that provides and maintains the gentleness, clarity and guidance needed to connect my spirit to all my relations. The language spoken within ceremony goes beyond the intelligence of the mind but travels straight to heart. I am reminded of my roles and responsibilities as an ayisîniw ota askiy (human of this land) to the Laws of this Land, whom we call nikâwiw askiy (Mother Earth) in nêhiyawêwin (Cree language). Returning to land-based teachings, art practices and nêhiyawêwin, I am reclaiming my inherent sacred role as a mother and grandmother. Decolonization and indigenization are important spirit-centred spaces to bridge Indigenous knowledge and worldviews as well as to have uncomfortable conversations. I will share how arts-based practices and cultural land-based teachings supported the transformation of confronting and transcending historical wounds into intergenerational resilience.</p> <p>Lana Whiskeyjack is a multidisciplinary treaty scholar from Saddle Lake Cree Nation.
